

BILJKE KOJE JEDEMO

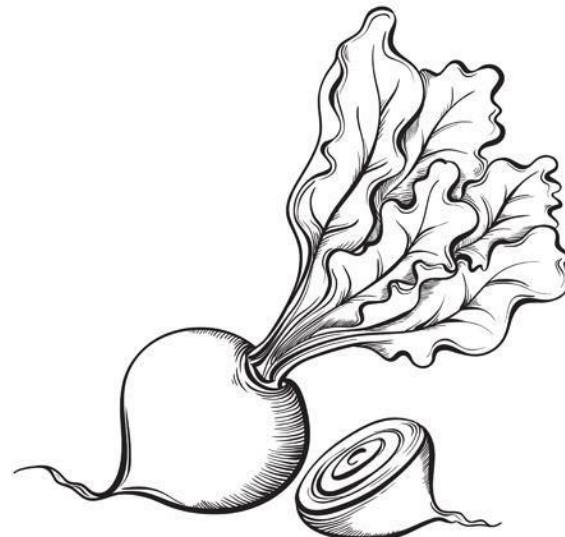

Aktivnost pripremila odgojiteljica Kristina Brežac Legović

MOŽEMO JESTI KORIJENE.

MRKVA

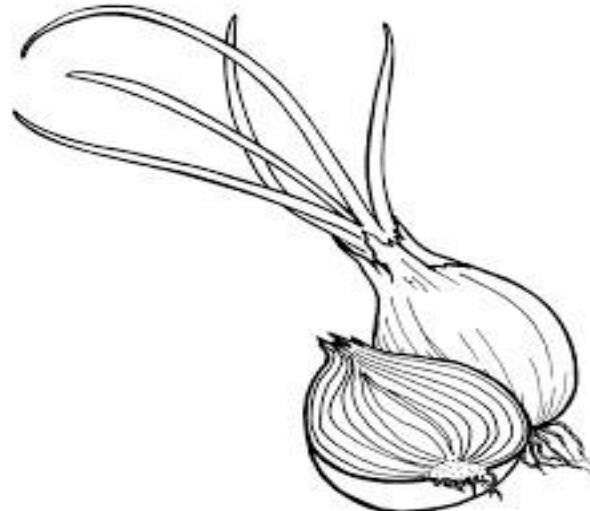

CIKLA

REPA

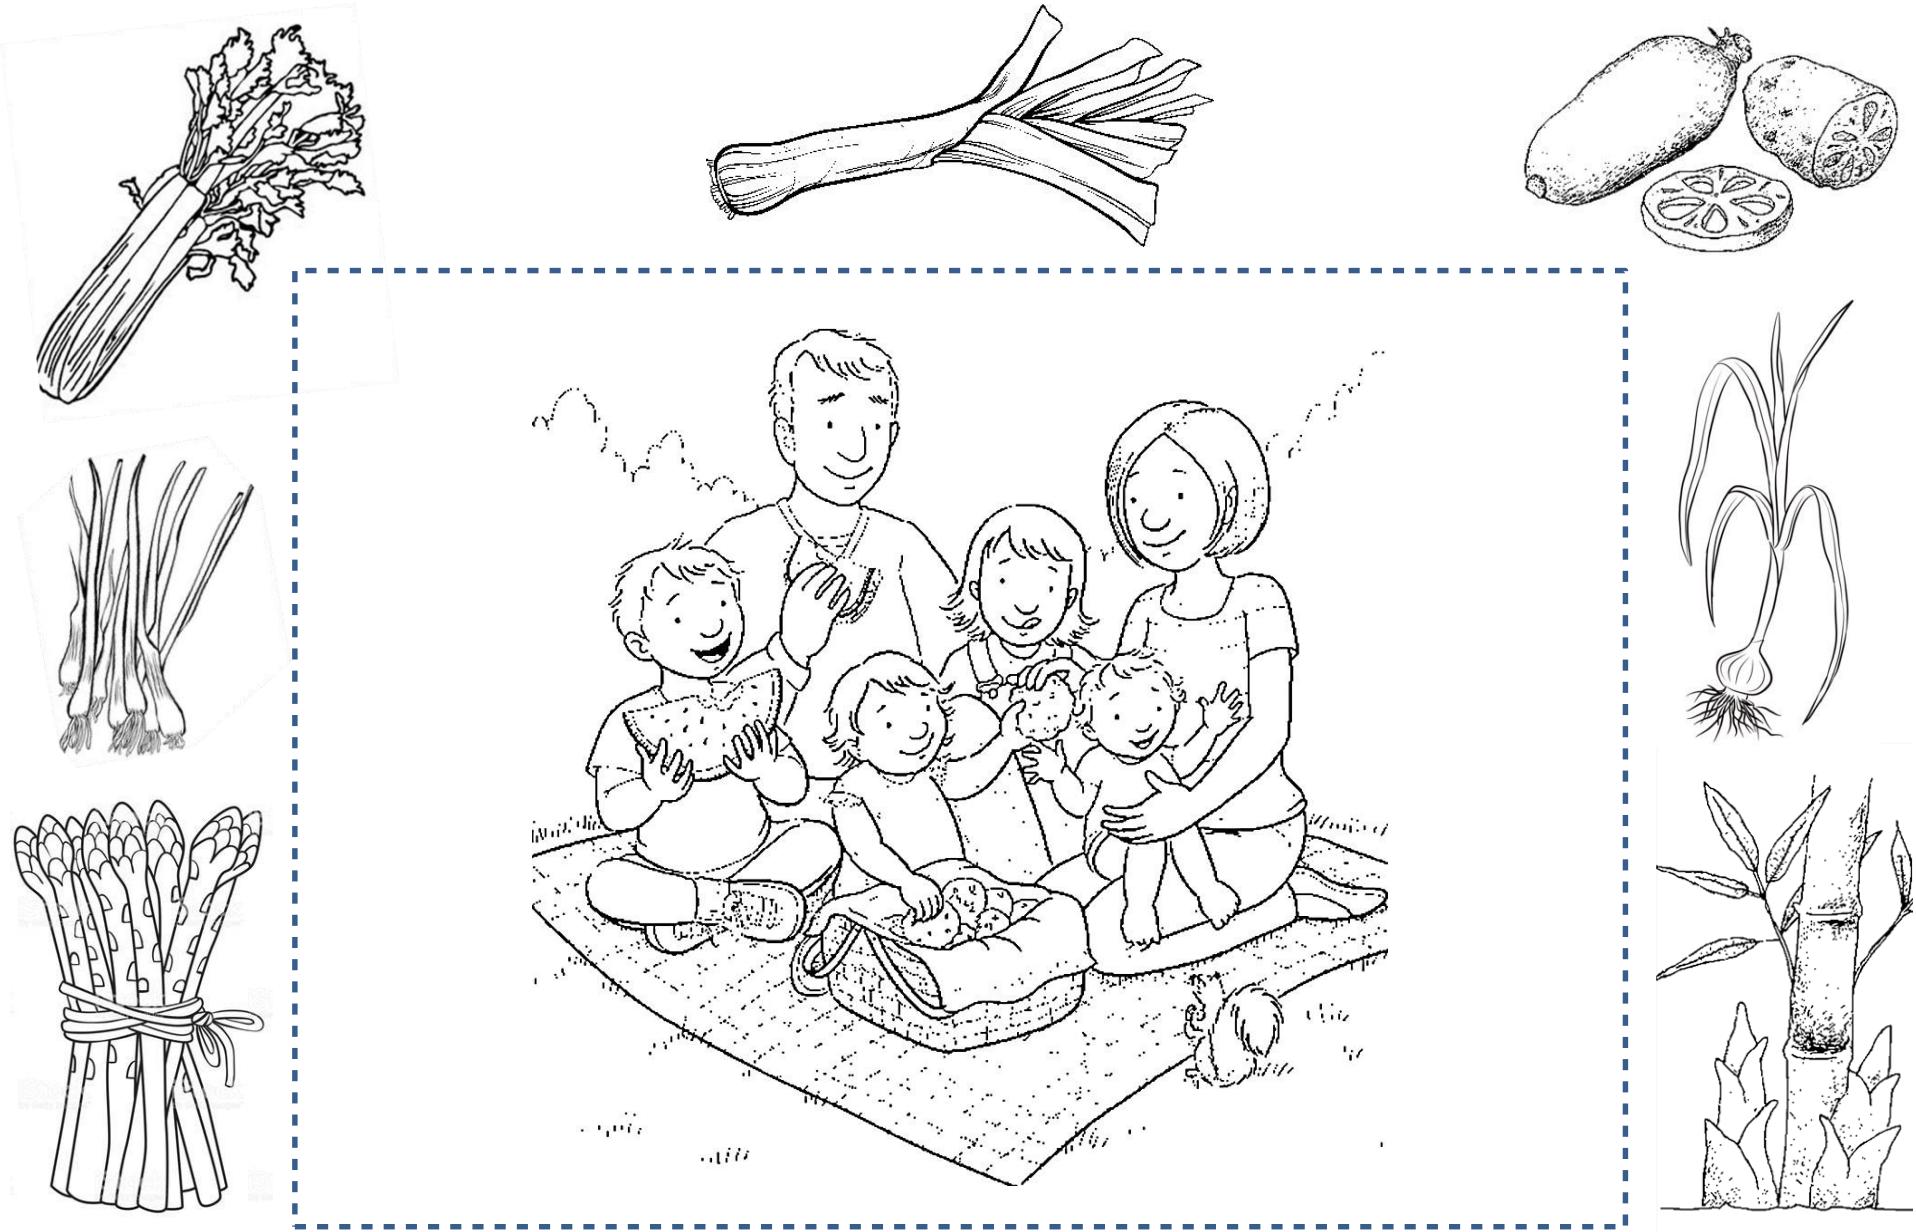

ROTKVICE

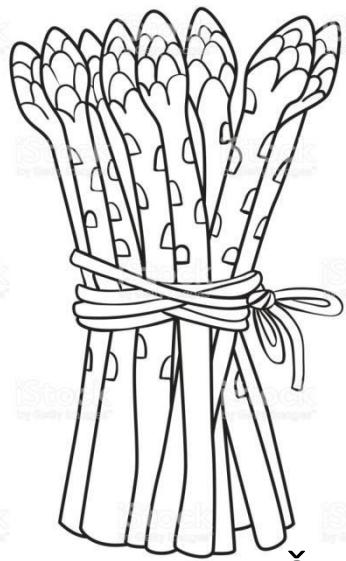

LUK

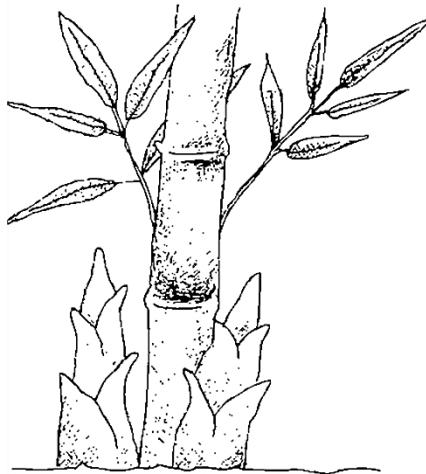

CELER

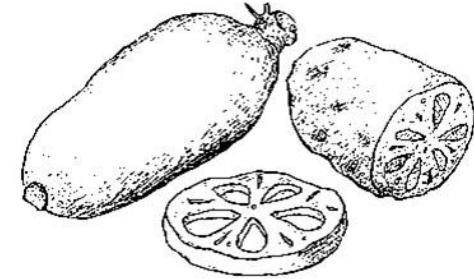

MOŽEMO JESTI STABLJIKE.

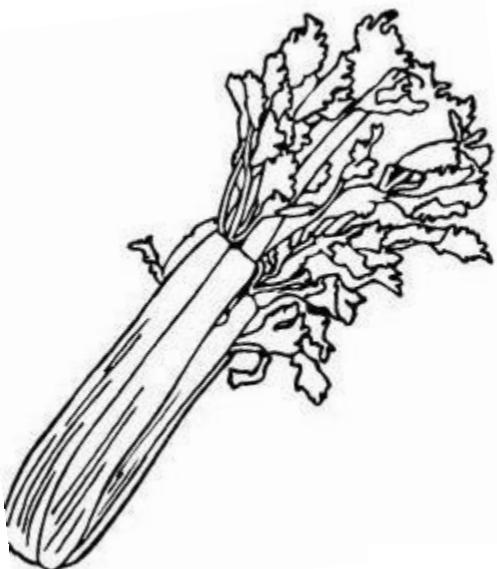

ŠPAROGE

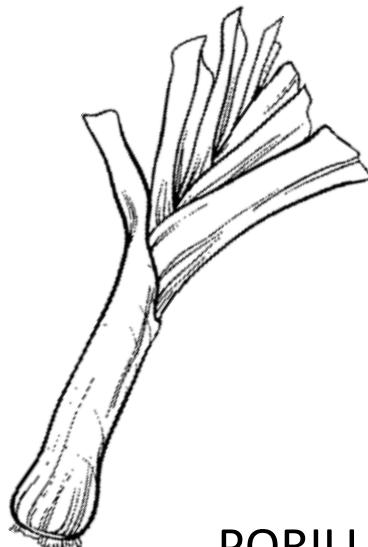

IZDANCI BAMBUSA

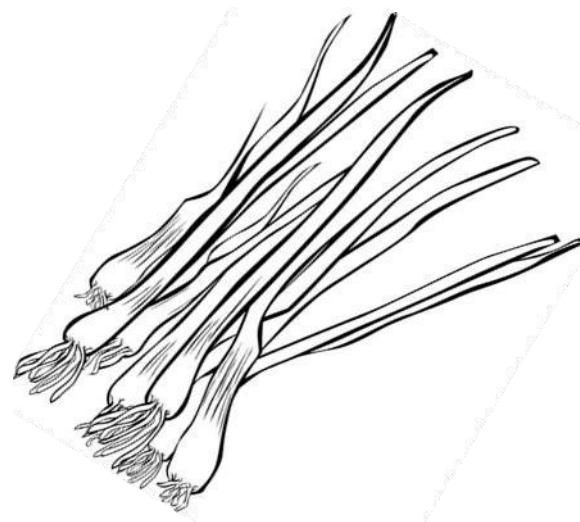

STABLJICA LOTUSA

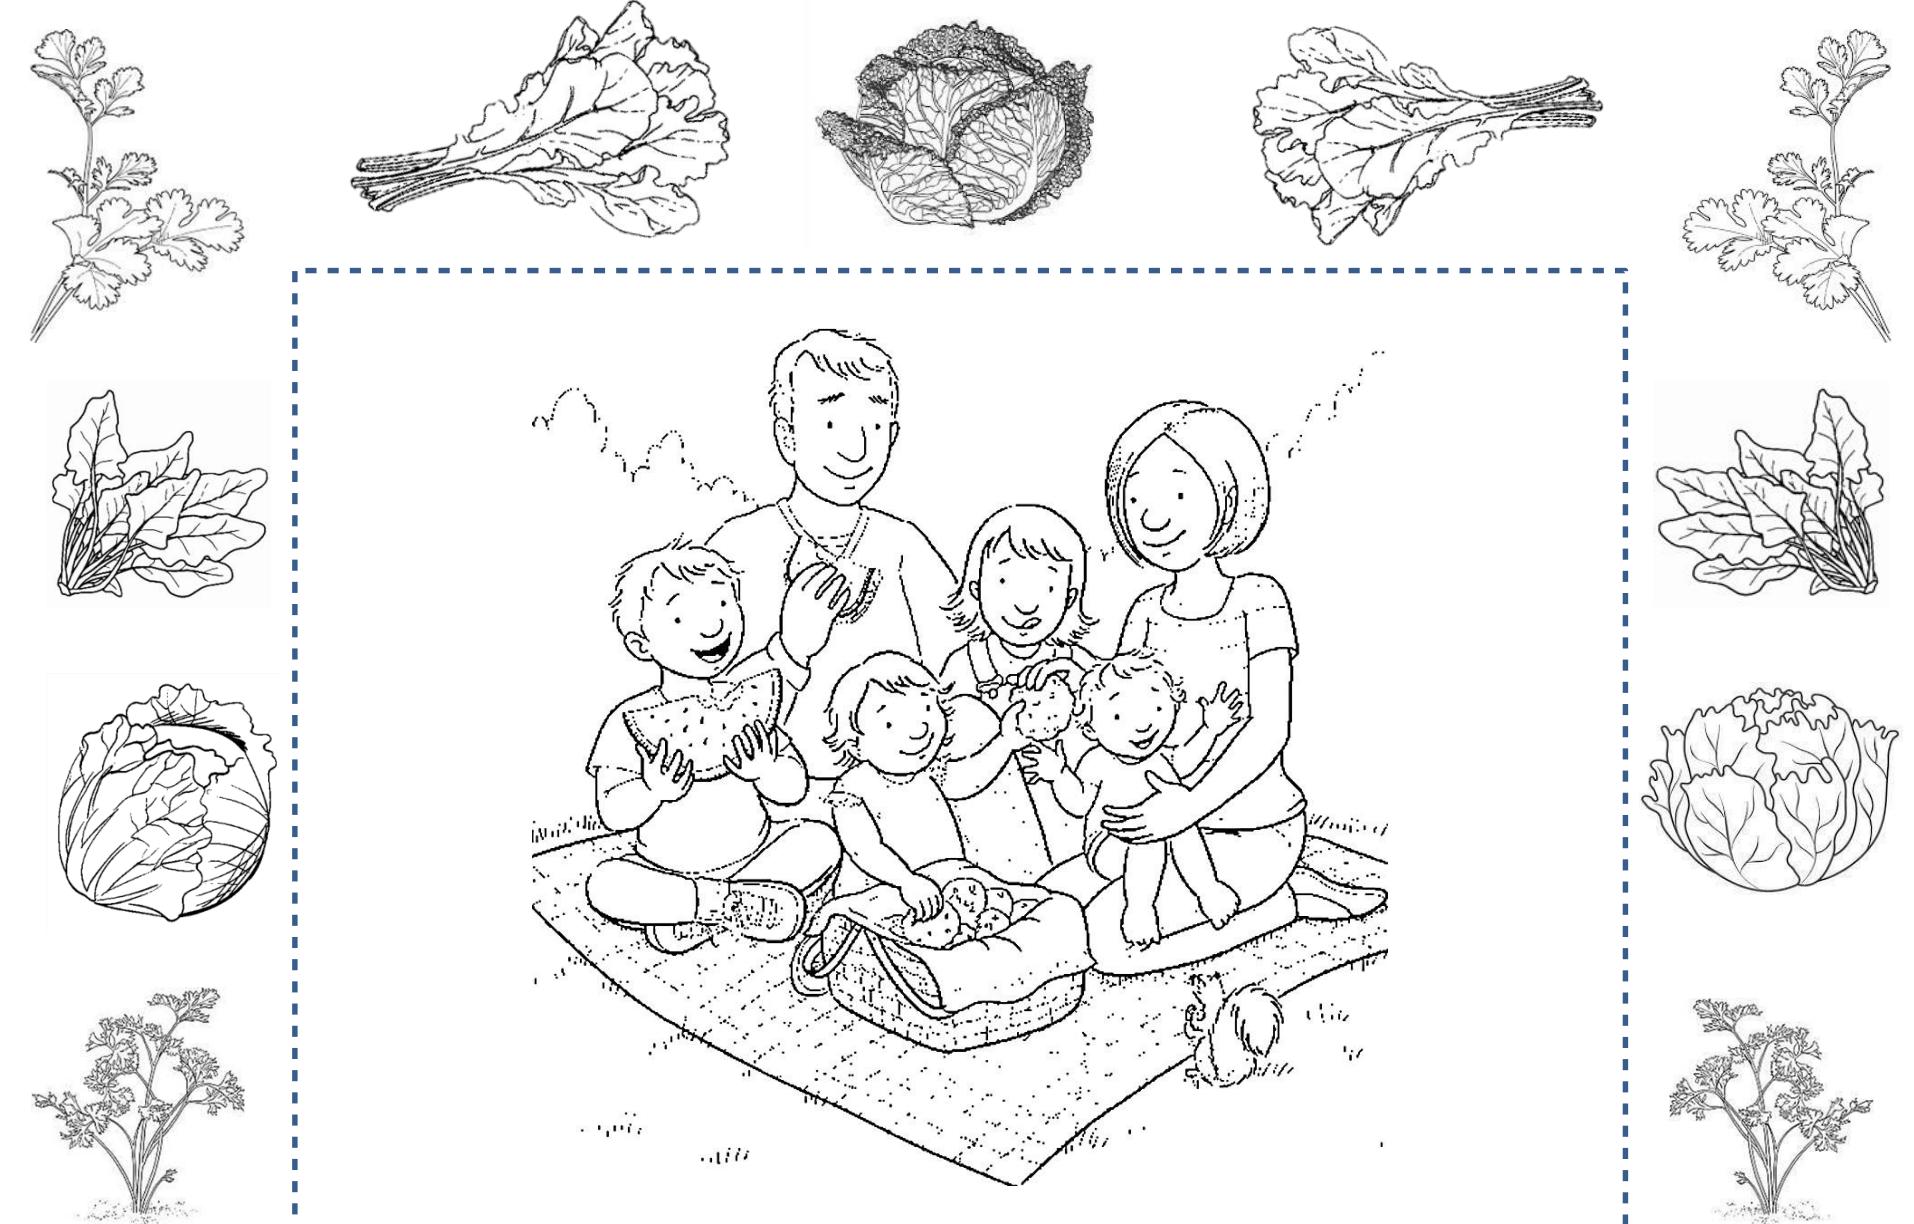

CELER

PORILUK

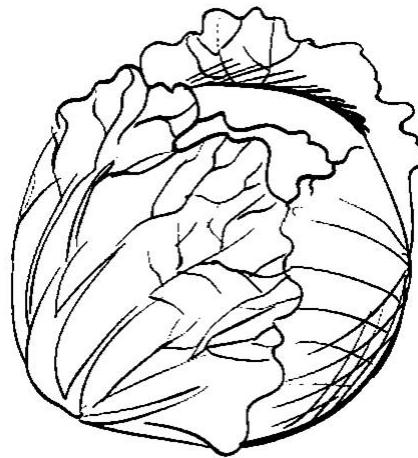

MLADI LUK

MOŽEMO JESTI LISTOVE.

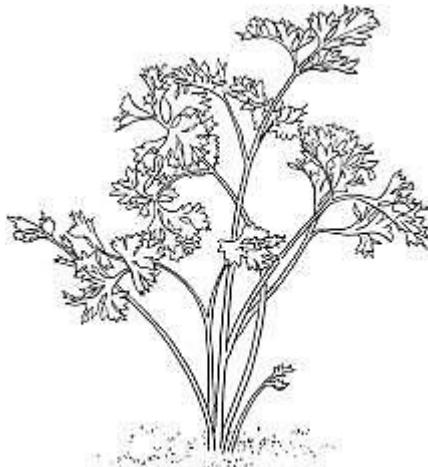

SALATA

KUPUS

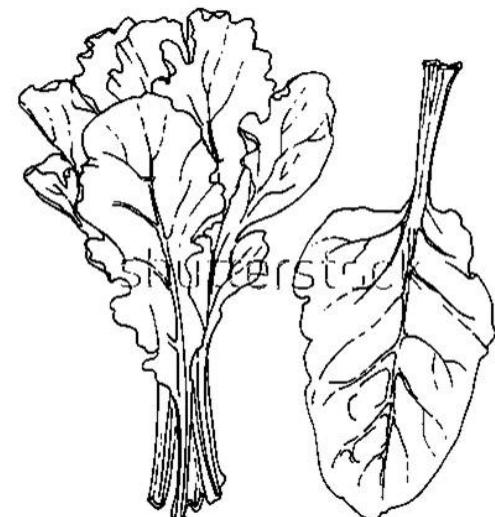

KELJ

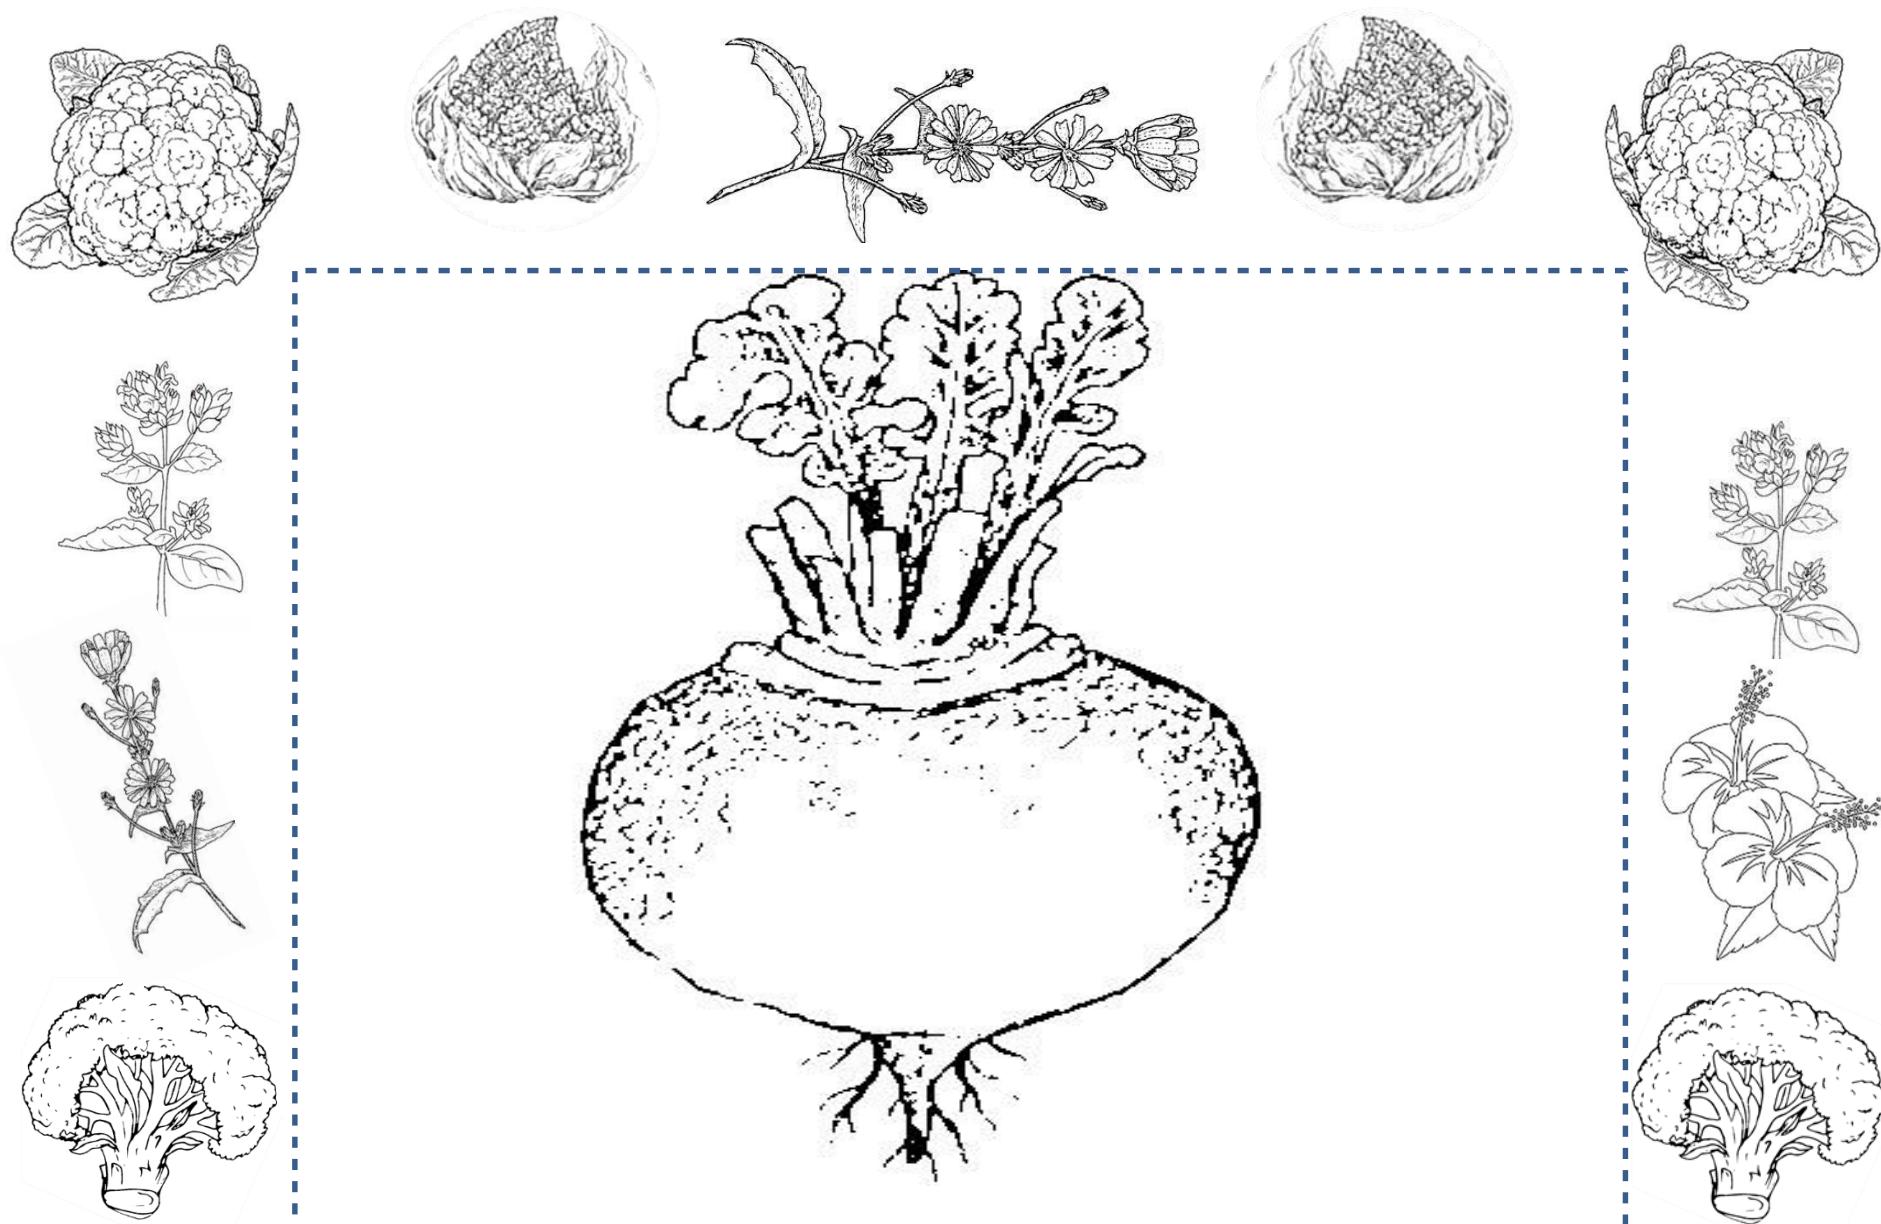

PERŠIN

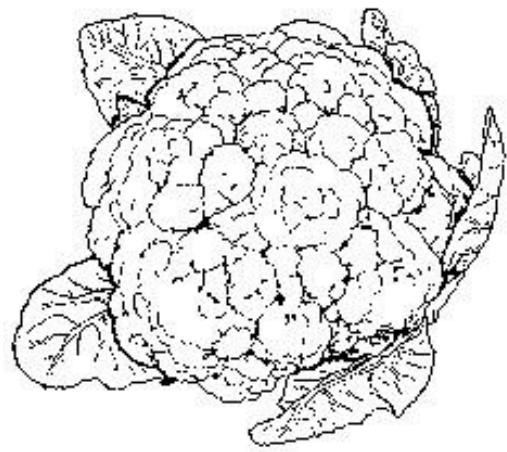

ŠPINAT

BLITVA

MOŽEMO JESTI CVJETOVE.

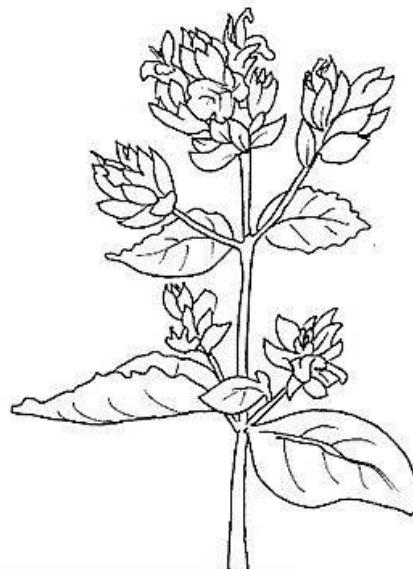

CVJETAČA

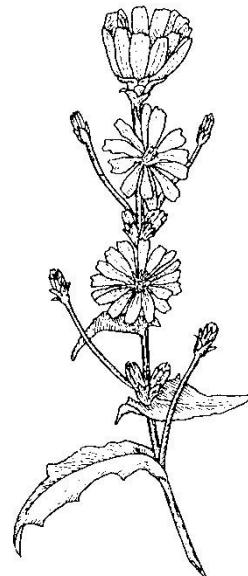

BROKULA

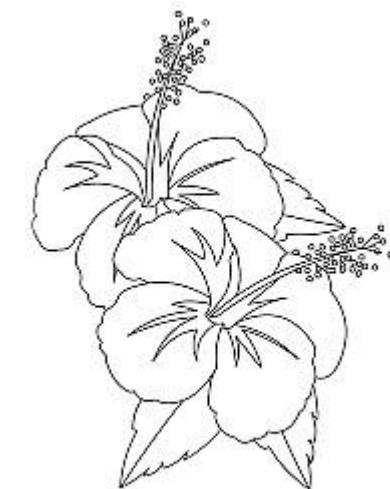

ŠENON CVJETAČA

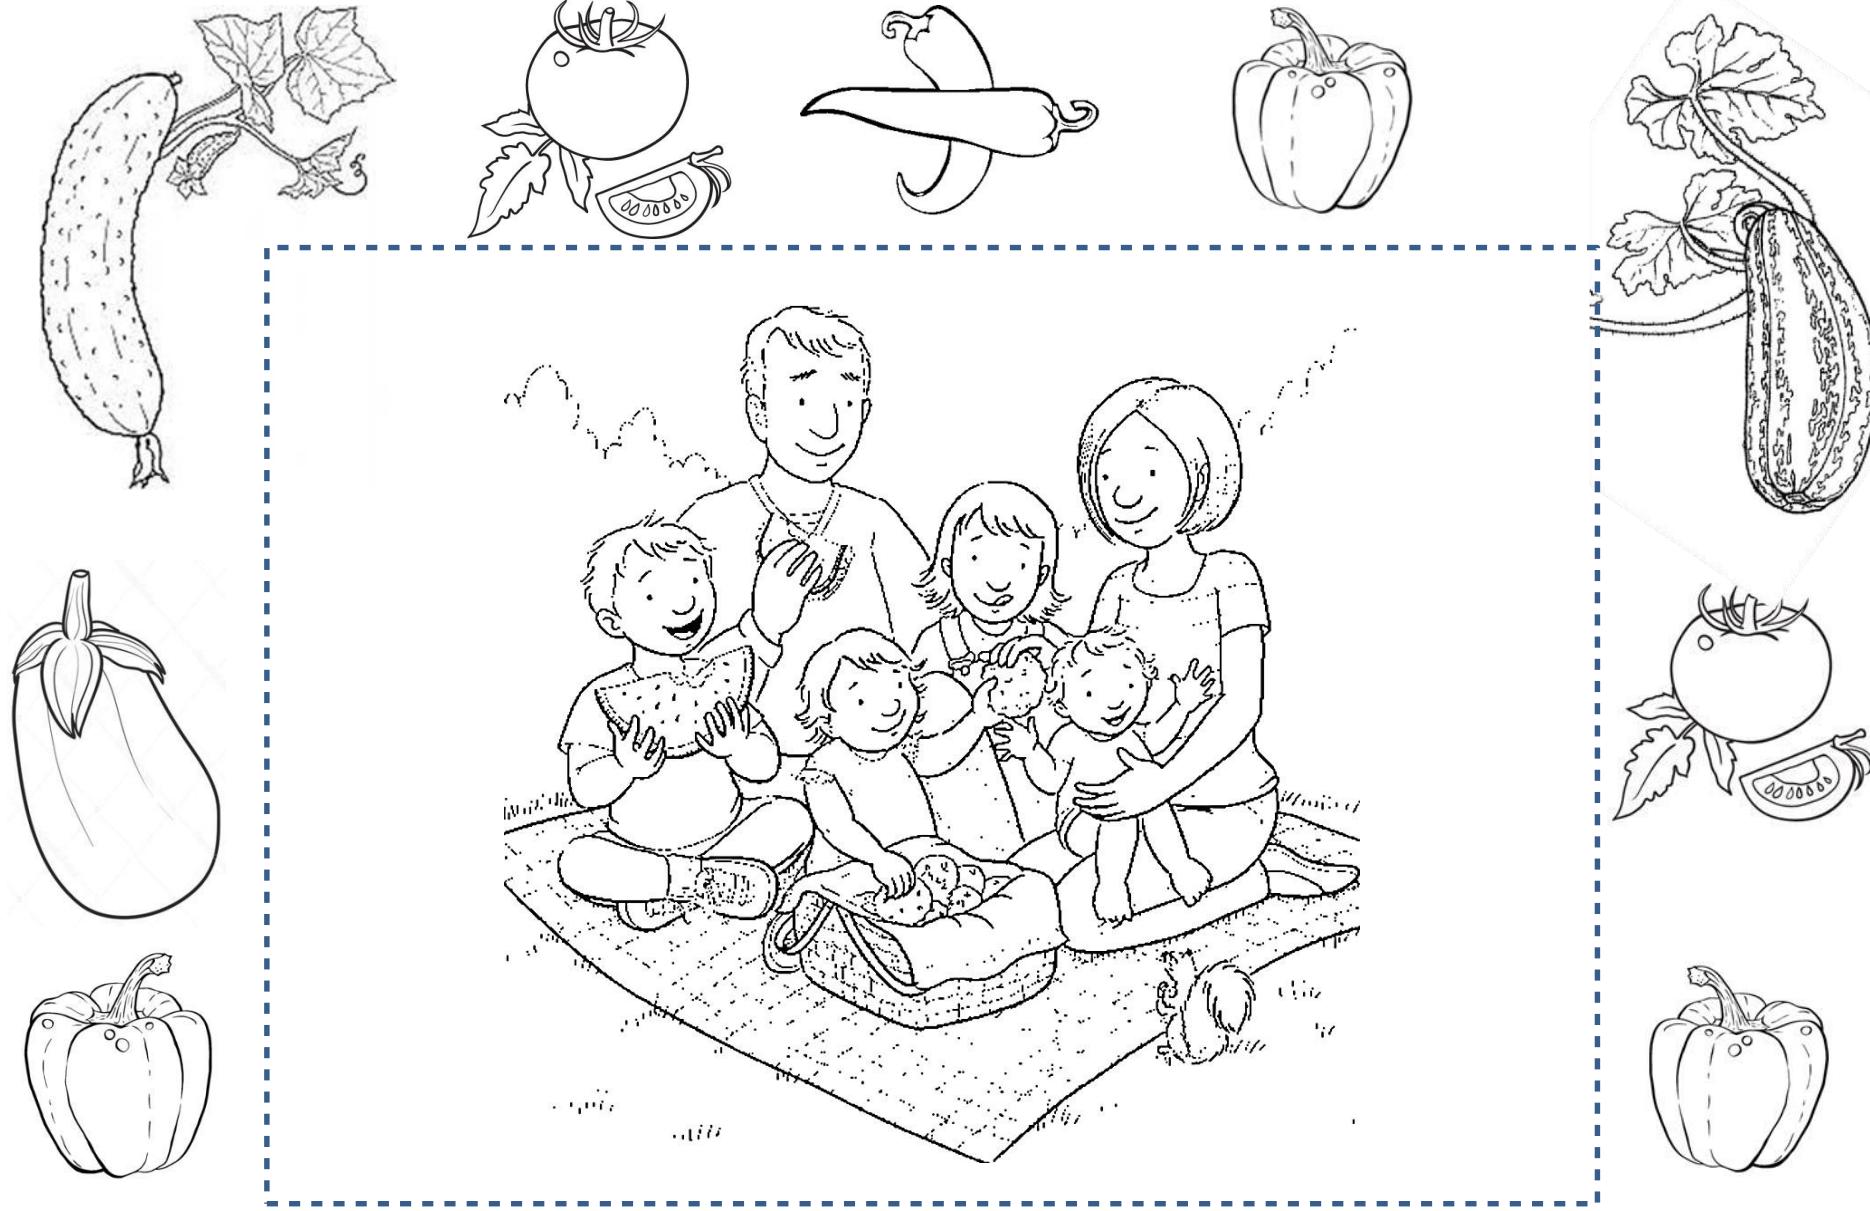

ORIGANO

CIKORIJA

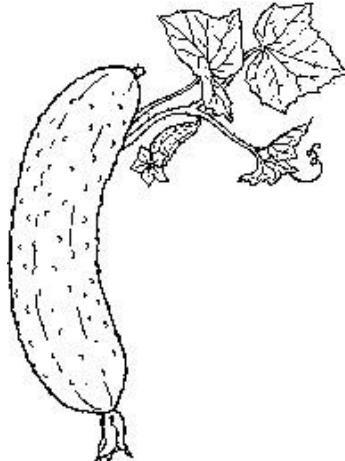

HIBISKUS

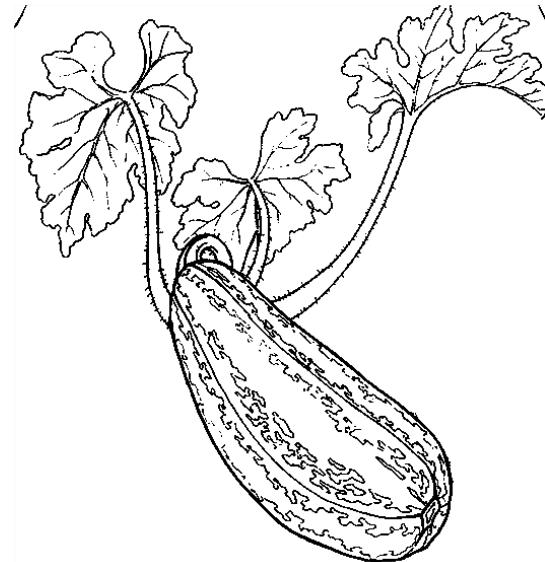

MOŽEMO JESTI PLODOVE.

PATLIDŽAN

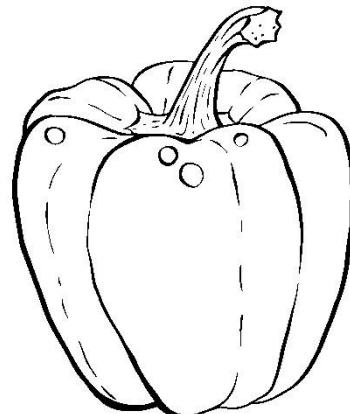

KRASTAVAC

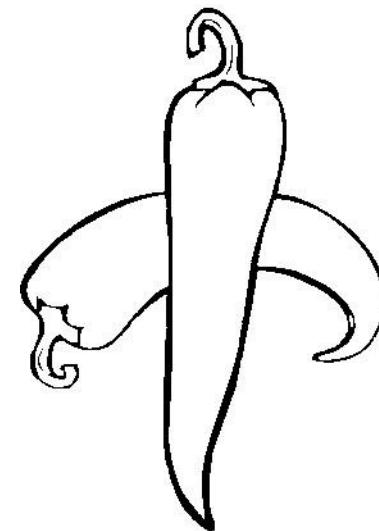

TIKVICA

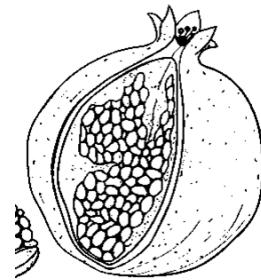

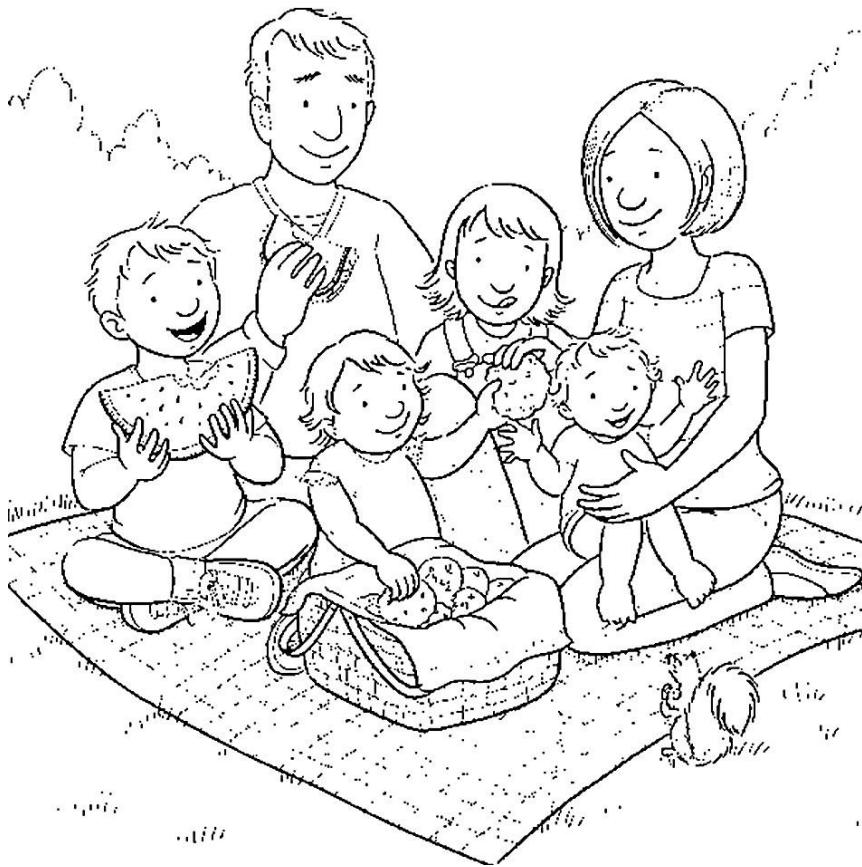

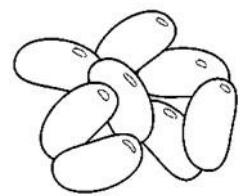

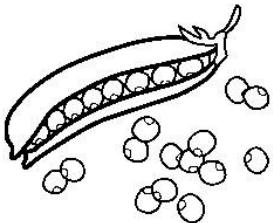

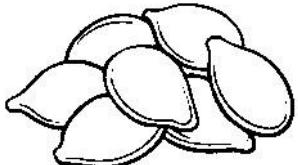

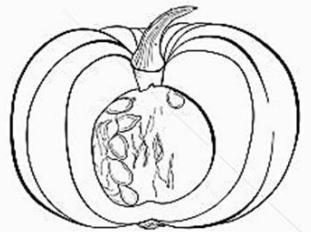

RAJČICA

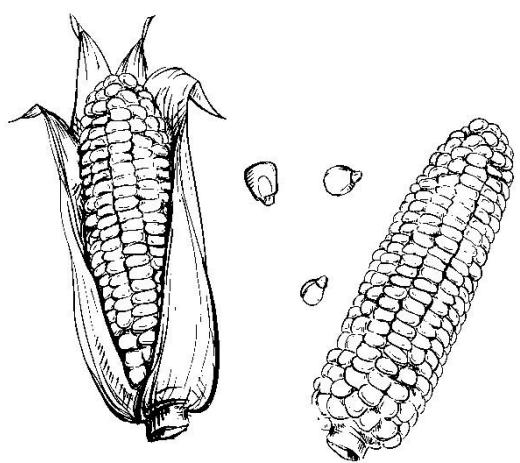

PAPRIKA

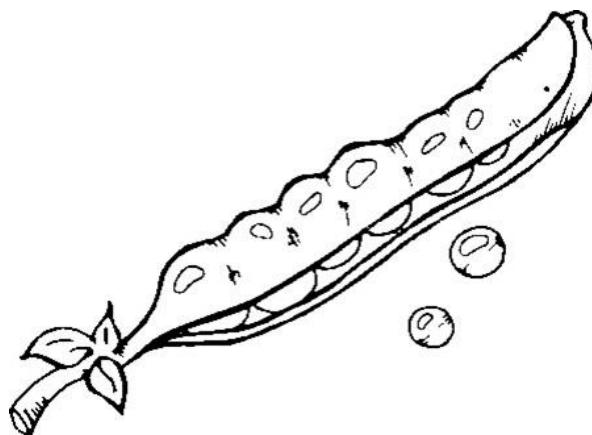

LJUTE PAPRIČICE

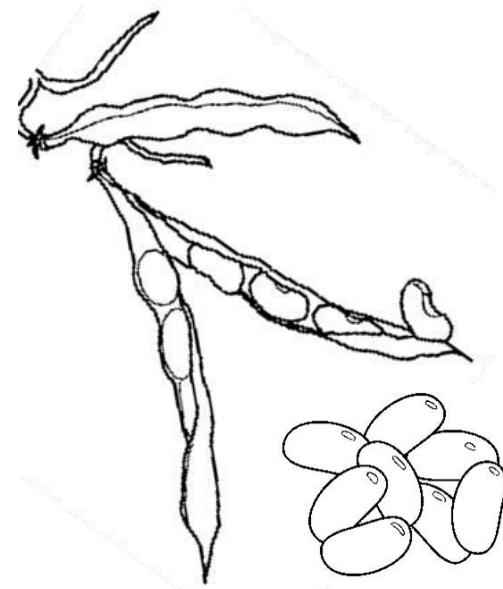

MOŽEMO JESTI SJEMENKE.

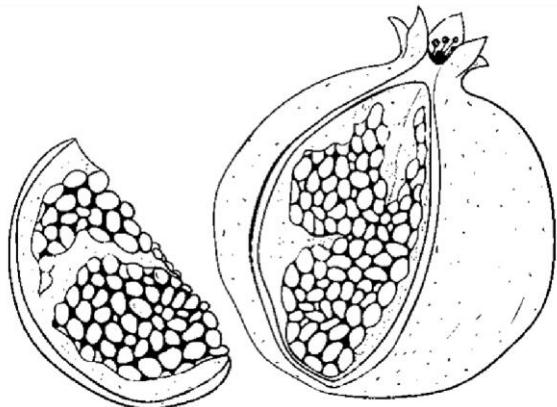

KUKURUZ

GRAŠAK

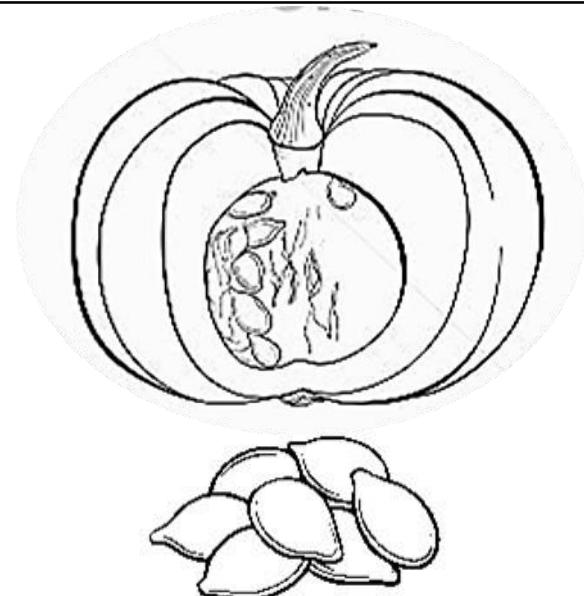

GRAH

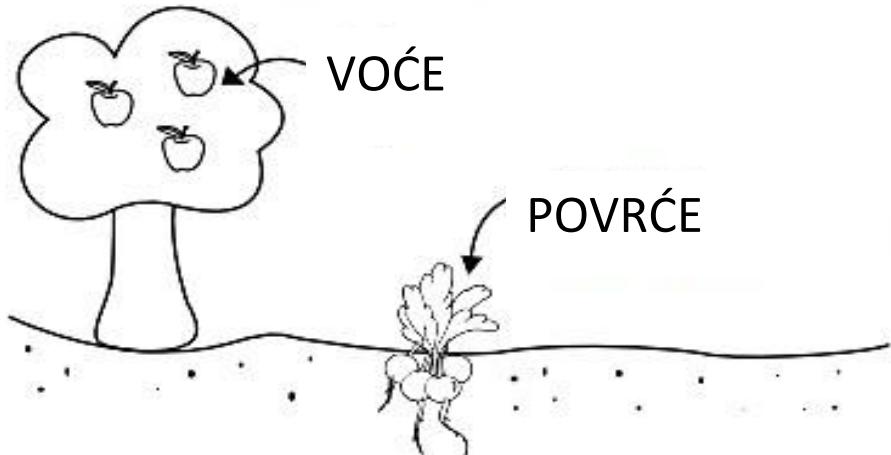

NAR

SJEMENKE SUNCOKRETA

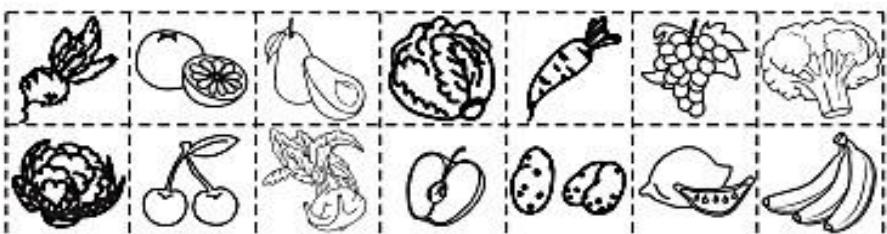

SJEMENKE BUNDEVE

VOĆE raste na drveću ili lozi te ima sjemenke od kojih mogu narasti nove biljke.

POVRĆE raste na biljkama ili pod zemljom. To su dijelovi biljke koji nemaju sjeme.

1. ZADATAK: Obojite voće i povrće s prijašnjih stranica točno u onim bojama u kojima se nalaze u prirodi. Fotografije voća i povrća iz prvog dijela (u boji) u tome će vam puno pomoći.

2. ZADATAK: Sada znate razliku između voća i povrća pa ćete sličice voća zalijepiti na drvo, a sličice povrća ispod drveta.
